Subject: questionnaire

Lyle Maelstrom: Candidate
Liberal: Party
Peace River: Riding

In response to your questionnaire:

1. Whatever I can to ensure pesticides are not employed in a way to harm humans/animals. Legislation with "teeth" may be needed.
5. Review the issue with a view to making it mandatory.
6. In principle, such parties should not be allowed.
7. Again, put some "teeth in the regulations".
8. I will support prompt action for Resolution 113.
9. Include it in WHMIS.
10. There should be such labelling. I would support such a step.
11. Need a variety of measures including use of ones mentioned above.
12. I support further studies/research to get better answers.
13. We really should have one - I strongly believe this!
14. Again, there are a number of measures in the short term, including many of the items noted above.
16. Should be labelled.
17. I support the statement above for the most part. The level of course is in the details and I would work towards legislative solutions to make a reality of the Standing Committee on Environmental and Sustainable Development.
